PROFILE

Personable and technically fluent professional with 1.9+ years of hands-on experience building and explaining software products to diverse users. Genuinely passionate about Apple's ecosystem of products and services, with a strong ability to translate technical detail into simple, relatable guidance. Comfortable in fast-paced, team-based environments, quick to learn new products, and driven to create a genuine, only-at-Apple experience for every customer.

RELEVANT STRENGTHS

- Product knowledge & curiosity: Self-driven learner who stays current on fast-evolving technology (web frameworks, AI tools, cloud platforms) — the same curiosity that drives staying up to date on Apple products, services and purchase options.
- Simplifying the complex: Regularly translated technical workflows and features into plain language for non-technical stakeholders and end users, a direct parallel to personalising product solutions for customers.
- Team collaboration: Worked closely with cross-functional teams (design, QA, backend) sharing knowledge and supporting colleagues — mirrors Apple's emphasis on shared responsibility and accountability.
- Fast-paced, multi-priority environments: Experienced in juggling multiple concurrent tasks and tight deadlines across projects without compromising quality or attention to detail.
- Trust & discretion: Handled sensitive user and business data with strict accuracy and confidentiality across enterprise applications.

EXPERIENCE

Jr. Frontend Developer | Entertainment Technologists, Pune *April 2026 – Present*

- Collaborate daily with a cross-functional team to build and refine a B2B marketplace platform, communicating updates and gathering feedback from stakeholders across departments.
- Explain technical features and platform capabilities in clear, simple terms to non-technical colleagues and clients, supporting adoption and reducing confusion.
- Manage multiple concurrent tasks and shifting priorities in a fast-paced, deadline-driven environment while maintaining a high standard of accuracy.

Software Developer | ANG Software Ltd, Pune *Jan 2025 – March 2026*

- Supported end users and internal teams by walking them through new features of an enterprise insurance platform, tailoring explanations to each audience's familiarity with the product.
- Worked within a shared-responsibility team model, proactively helping colleagues troubleshoot issues and pass on product knowledge.
- Handled sensitive customer and policy data with strict confidentiality and accuracy, in line with company data-protection standards.
- Balanced several ongoing projects simultaneously, prioritising effectively to meet deadlines without sacrificing quality.

EDUCATION

Bachelor of Engineering (B.E.), Information Technology *Graduated June 2025*
Vidyalankar Institute of Technology, Mumbai — CGPA 9.48/10 (82.15%)

HSC, S.S. High School & Jr. College, Seawood, Navi Mumbai *2019 – 2021*
SSC, J.M.R.E.S ROHA RAIGAD *2018 – 2019*
